

SAFETY DATA SHEET

1. Identification			
Product identifier	Copper Zinc Alloys		
Other means of identification			
SDS number	3		
Product code	C21000, C22000, C22600, C23000, C24000, C26000, C26100, C26800, C27000, C27450, C28000, C31400, C31600, C36000, C37700, C44300, C46400, C67300, C67310, C67400, C69300, C69340, C83400, CGM-7, CA673-MOD, ADVSI, 422, 70/30, 80/20		
Recommended use	Manufacturing		
Recommended restrictions	Not assigned.		
Manufacturer / Importer / Suppli	er / Distributor information		
Address Telephone E-mail			
Contact person			
Emergency phone number			
Compony name			
Company name			
2. Hazard(s) identification			
Physical hazards	Not classified.		
Health hazards	Sensitization, skin	Category 1	
	Carcinogenicity	Category 2	
	Reproductive toxicity (fertility, the unborn child)	Category 1A	
	Specific target organ toxicity, repeated exposure	Category 2 (Lung, central nervous system)	
OSHA hazard(s)	Not classified.		
Label elements			
Hazard symbol			
Signal word	Danger		
Hazard statement	May cause an allergic skin reaction. May cause damage to organs (Lung, central nervous system) through prolonged or repeated exposure. Suspected of causing cancer. May damage fertility or the unborn child.		
Precautionary statement			
Prevention	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required. Contaminated work clothing should not be allowed out of the workplace.		
Response	If on skin: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse. If exposed or concerned: Get medical advice/attention. Get medical advice/attention if you feel unwell.		
Storage	Store locked up.		
Disposal	Dispose of contents/container in accordance v	with local/regional/national/international regulations.	
Hazard(s) not otherwise classified (HNOC)	Not classified.		
Environmental hazards	Hazardous to the aquatic environment, long-term hazard	Category 2	

3. Composition/information on ingredients

Mixture

Chemical name	Common name and synonyms	CAS number	%
Copper	- , - , , , , , , , , , , , , , , , , - , , , , , , , , , , , , , , , , , - ,	7440-50-8	59-96

Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full p Selection of respiratory protection for firefight the workplace.		
Fire-fighting equipment/instructions	Move containers from fire area if you can do	t without risk.	
6. Accidental release meas	sures		
Personal precautions, protective equipment and emergency procedures	Ensure adequate ventilation. Avoid inhalation protective clothing as described in Section 8	of dust and contact with sk of this safety data sheet.	in and eyes. Wear
Methods and materials for containment and cleaning up	Avoid dust formation. Allow spilled material to container for recycle or disposal. Collect dust The vacuum cleaner should be explosion-pro collected with shovel, broom or the like. This is hazardous waste.	using a vacuum cleaner eq ofed. If not possible, gently	uipped with HEPA filter. moisten dust before it is
	Avoid release to the environment. Do not con		

7. Handling and storage

Precautions for safe handling	Follow special national provisions related to work with lead and its compounds. Pregnant women should not work with the product, if there is the least risk of lead exposure. Welding, burning, sawing, brazing, grinding or machining operations may generate fumes and dusts of metal oxides. Provide adequate ventilation. Avoid contact with sharp edges and hot surfaces. Avoid generation and spreading of dust and fumes. Avoid inhalation of dust and contact with skin and eyes. Avoid contact with hot or molten material. Dust clouds may be explosive under certain conditions. Take precautionary measures against static discharges when there is a risk of dust explosion. Use explosion-proof electrical equipment if airborne dust levels are high. To prevent and minimize fire or explosion risk from static accumulation and discharge, effectively bond and/or ground product transfer system. Wear appropriate personal protective equipment. Do not use water on molten metal. Do not eat, drink or smoke when using the product. Keep the workplace clean. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Keep dry. Store away from incompatible materials.

8. Exposure controls/personal protection

Occupational exposure limits

US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

Components	Туре	Value	
Lead (CAS 7439-92-1)	TWA	0.05 mg/m3	
US. OSHA Table Z-1 Limits for Air	Contaminants (29 CFR 1910.10	000)	
Components	Туре	Value	Form
Aluminum (CAS 7429-90-5)	PEL	5 mg/m3	Respirable dust.
		15 mg/m3	Total dust.
Copper (CAS 7440-50-8)	PEL	1 mg/m3	Dust and mist.
		0.1 mg/m3	Fume.
Manganese (CAS 7439-96-5)	Ceiling	5 mg/m3	Fume.
Nickel (CAS 7440-02-0)	PEL	1 mg/m3	
Silicon (CAS 7440-21-3)	PEL	5 mg/m3	Respirable fraction.
		15 mg/m3	Total dust.
Tin (CAS 7440-31-5)	PEL	2 mg/m3	
US. ACGIH Threshold Limit Values	3		
Components	Туре	Value	Form
Aluminum (CAS 7429-90-5)	TWA	1 mg/m3	Respirable fraction.
Copper (CAS 7440-50-8)	TWA	1 mg/m3	Dust and mist.
		0.2 mg/m3	Fume.
Lead (CAS 7439-92-1)	TWA	0.05 mg/m3	
Manganese (CAS 7439-96-5)	TWA	0.2 mg/m3	
Nickel (CAS 7440-02-0)	TWA	1.5 mg/m3	Inhalable fraction.
Tin (CAS 7440-31-5)	TWA	2 mg/m3	
US. NIOSH: Pocket Guide to Chem	nical Hazards		
Components	Туре	Value	Form
Aluminum (CAS 7429-90-5)	REL	5 mg/m3	Welding fume or pyrophoric powder.
		5 mg/m3	Respirable.
		10 mg/m3	Total
Copper (CAS 7440-50-8)	REL	1 mg/m3	Dust and mist.
Lead (CAS 7439-92-1)	REL	0.05 mg/m3	
Manganese (CAS 7439-96-5)	REL	1 mg/m3	Fume.
	STEL	3 mg/m3	Fume.
	OILL		
Nickel (CAS 7440-02-0)	REL	0.015 mg/m3	
		0.015 mg/m3 5 mg/m3	Respirable.
Nickel (CAS 7440-02-0) Silicon (CAS 7440-21-3)	REL		Respirable. Total

Biological limit values

US. ACGIH. BEIs. Biological Exposure Indices

Components	Value	Determinant	Sampling Time
Lead (CAS 7439-92-1)	300 µg/l	Lead	*
* - For sampling details, p	lease see the sour	ce document.	
Exposure guidelines	Follow stand	ard monitoring procedu	res.
Appropriate engineering controls	inhalation of equipment if divided meta	dust. Ventilate as need airborne dust levels are llic dust generated by g	ve Occupational Exposure Limits and minimize the risk of ed to control airborne dust. Use explosion-proof ventilation high. Special ventilation should be used to convey finely rinding, sawing etc., in order to eliminate explosion hazards. neasurements when working with lead and its compounds.
ndividual protection measu	res, such as pers	onal protective equipm	nent
Eye/face protection	glasses or go burning, or b	oggles, a welding helme	where there is danger of eye contact. In addition to safety at with appropriate shaded shield is required during welding, recommended, in addition to safety glasses or goggles, g.
Skin protection			
Hand protection			revent cuts and abrasions. When material is heated, wear ms. Suitable gloves can be recommended by the glove
Other	Wear suitab	le protective clothing.	
Respiratory protection	with particle applicable ex program that	filter. When engineering posure limit, use a NIO t meets OSHA's 29 CFF	isk of inhalation of dust, use suitable respiratory equipment controls are not sufficient to lower exposure levels below the SH approved respirator for dusts. A respiratory protection R 1910.134 and ANSI Z88.2 requirements must be followed rant a respirator's use. Seek advice from local supervisor.
Thermal hazards	Wear approp	priate thermal protective	clothing, when necessary.
General hygiene considerations	and before e equipment to separately. O potential cro eliminate the	ating, drinking, and/or s premove contaminants. Contaminated uniforms ss-contamination. If pos possibility of contamina	ene measures, such as washing after handling the material moking. Routinely wash work clothing and protective Private clothes and working clothes should be kept should be laundered separately from other clothing to prevent sible, an industrial laundry service should be used to ating the home environment. Handle in accordance with good es. Observe any medical surveillance requirements.

9. Physical and chemical properties

Appearance	Solids, Rectangles, Shapes, Tubes, Clips, Shells and Turnings.
Physical state	Solid.
Form	Solids, Rectangles, Shapes, Tubes, Clips, Shells and Turnings.
Color	Yellow to red.
Odor	None.
Odor threshold	Not available.
рН	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not available.
Flash point	Not available.
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or exp	losive limits
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	Insoluble in water.
Copper Zinc Alloys	

3218 Version #: 01 Revision date: - Issue date: 11-05-2012

Partition coefficient (n-octanol/water)	Not available.			
Auto-ignition temperature	Not available.			
Decomposition temperature	Not available.			
Viscosity	Not available.			
Other information				
Density	7.5 - 9 lb/in³			
10. Stability and reactivity				
Reactivity	Stable at normal conditions.			
Chemical stability	Stable at normal conditions. Mas use, storage and transport.	ssive metal is stable and non reactive under normal conditions of		
Possibility of hazardous reactions	Hazardous polymerization does r resulting in spattering and fuming	not occur. Hot molten material will react violently with water g.		
Conditions to avoid		ials. Contact with acids will release flammable hydrogen gas. Is may be explosive under certain conditions.		
Incompatible materials	Acids. Ammonium nitrate. Fluoric Sulfur.	de. Halogens. Nitrates. Phosphorus. Strong oxidizing agents.		
Hazardous decomposition products		g, grinding or machining operations may generate dusts and de fumes may be formed at elevated temperatures.		
11. Toxicological informat	ion			
Information on likely routes of e	xposure			
Ingestion		he product. However, ingestion of dusts generated during ausea and vomiting.		
Inhalation		tion. Elevated temperatures or mechanical action may form dust g to the mucous membranes and respiratory tract.		
Skin contact	May cause an allergic skin reacti allergic to nickel may develop ec	ion. Hot or molten material may produce thermal burns. Workers zema or rashes.		
Eye contact		Molten material will produce thermal burns. Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the eye.		
Symptoms related to the physical, chemical and toxicological characteristics	May cause irritation to mucous membranes. May cause skin and eye irritation. Coughing. Shortness of breath. Wheezing. The principal symptoms of lead poisoning are gastro-intestinal or central nervous system disturbances and anemia. Sensitization.			
Information on toxicological eff	ects			
Acute toxicity	metal fume fever. Acute exposur	rmed fumes/dusts of metal oxides can produce symptoms of re to dust, and fume may cause irritation of skin and eyes. In causes an asthma-like attack, with wheezing, bronchospasm,		
Components	Species	Test Results

Acute				
Oral				
LD50	Rat	3160 mg/kg		
Skin corrosion/irritation		anical action may form dust and fumes which may be irritating to d respiratory tract. Hot or molten material may produce thermal		
Serious eye damage/eye irritation	Dust from machining operation in	n the eyes may cause irritation.		
Respiratory sensitization	Not classified.			
Skin sensitization	Frequent or prolonged contact may defat and dry the skin, leading to discomfort and dermatitis. May cause allergic skin reaction.			
Germ cell mutagenicity	No data available.			
Carcinogenicity	Possible cancer hazard - may ca	ause cancer based on animal data.		
IARC Monographs. Overall	Evaluation of Carcinogenicity			
Lead (CAS 7439-92-1)	2	2B Possibly carcinogenic to humans.		
Nickel (CAS 7440-02-0)		1 Carcinogenic to humans.		
NTP Report on Carcinogens Nickel (CAS 7440-02-0)		Known To Be Human Carcinogen.		
		Reasonably Anticipated to be a Human Carcinogen.		

Reproductive toxicity	Nickel: Has shown teratogenic effects in laboratory animals. Lead is a teratogen. Elevated lead exposure of either parent before pregnancy may increase the changes of miscarriage or birth defects. Continuous exposure may result in decreased fertility. Exposure of the mother during pregnancy may cause birth defects.
Specific target organ toxicity - single exposure	Not available.
Specific target organ toxicity - repeated exposure	Causes damage to the following organs through prolonged or repeated exposure: Lung. Central nervous system.
Aspiration hazard	Not available.
Chronic effects	Danger of cumulative effects. Prolonged and repeated overexposure to dust and fumes can lead to benign pneumoconiosis (stannosis). Chronic inhalation of metallic oxide dust/fume may cause metal fume fever. Lead may produce maternal toxicity, toxicity to the fetus, and adverse effects to blood, bone marrow, central/peripheral nervous systems, kidney, liver, and reproductive system.
Further information	Lead is accumulated in the body and may cause damage to the brain and nervous system after prolonged exposure. Welding or plasma arc cutting of metal and alloys can generate ozone, nitric oxides and ultraviolet radiation. Ozone overexposure may result in mucous membrane irritation or pulmonary discomfort. UV radiation can cause skin erythema and welders flash.

12. Ecological information

Ecotoxicity	Toxic to a	quatic life with long lasting effects.	
Components		Species	Test Results
Lead (CAS 7439-92-1)			
	LC50	Rainbow trout, donaldson trout (Oncorhynhus mykiss)	1.17 mg/l, 96 Hours
Persistence and degradability	The produ	uct is not biodegradable.	
Bioaccumulative potential	The product contains potentially bioaccumulating substances.		
Mobility in soil	Alloys in massive forms are not mobile in the environment.		
Mobility in general	Alloys in massive forms are not mobile in the environment.		
Other adverse effects	An enviro	nmental hazard cannot be excluded in the	event of unprofessional handling or disposal.

13. Disposal considerations

Disposal instructions	This material and its container must be disposed of as hazardous waste. Dispose in accordance with all applicable regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Hazardous waste code	Z110: Inorganic compounds n.o.s.
Waste from residues / unused products	Recover and recycle, if practical. Solid metal and alloys in the form of particles may be reactive. Its hazardous characteristics, including fire and explosion, should be determined prior to disposal.
Contaminated packaging	Not applicable.
