

Safety Cables261 - 263

King Cable®261
 Nylon safety restraints262
 King safety whipsocks263
 King safety shackles263
 ASME air receiver manifold with King safety whipsock263

Air Tanks and Manifolds 264 - 267

ASME air receiver manifolds 264 - 265
 Whip hose assemblies265
 Manifolds 266 - 267
 Compressor Y267
 Lubricants267

In-Line Lubricators and Filters268 - 269

Lubricators268
 Air filter268
 Nipple filters269
 Lubricator with filter269
 Mini lubricators269

Valves, Mufflers, and Vents.....270 - 276

Safety check valves270
 Conical mufflers271
 Speed control mufflers271
 Breather vents271
 Quiet flow economy pneumatic silencers/mufflers.....272
 Keychain272
 Mini in-line filter272
 General purpose regulators272
 Needle valves273
 Desiccant dryer273
 Button and tank filler valves274
 Brass lever external drains274
 Brass external drain cocks274
 Safety pop-off valves275
 Flow control valves276
 Series C check valves276

Blow guns277 - 281

Safety 277 - 278
 Pistol Grip278
 Non-Safety 278 - 279
 Heavy duty280
 High volume 280 - 281

Air Hose.....282 - 283

Coil-Chief self-storing282
 Polyurethane 282 - 283
 Industrial coupler blow gun283

Tire pressure gauges..... 284

Swivels 285

Ball285
 In-line285
 Air tool285

Hose Reels.....286 - 287

Reelcraft® 286 - 287
 5000-Series286
 7000-Series286
 80000 Series287
 30000 manual driven.....287

FRLs288 - 338

Wilkerson 288 - 316
 Miniatures 288 - 291
 Filters 292 - 296
 Manual in-line desiccant dryer297
 Regulators 297 - 301
 Filter / regulator..... 302 - 303
 Lubricators..... 303 - 306
 Combination units 306 - 310
 Exhaust mufflers310
 Automatic drains311
 Lockout valves.....311
 Accessories and repair kits 312 - 316
 Series 1 317 - 337
 Miniatures 317 - 319
 Filters 319 - 322
 Regulators 323 - 326
 Filter / regulators 326 - 328
 Lubricators..... 328 - 331
 Combination units332
 Automatic drains333
 Accessories and repair kits 333 - 338

⚠ WARNING

The constant vibration created by air tools, like air drills and pavement breakers, is destructive to air hose couplings, especially the quick-acting type. To provide protection against coupling breakage and related hazards, Dixon® recommends the use of a whip hose. To construct a whip hose, connect one end of a short (3' to 10') air hose to the air tool using a 3500 type steel nipple. Connect the other end of the hose to the air supply using the standard quick-acting coupling. The heat-treated 3500 nipple will withstand vibration far better than the standard coupling and provide a safer connection. The whip hose should remain permanently connected to the tool.
